

VC4008

Volume remote Bticino

The VC4008 is a flush mount wall volume controller, designed to remotely control the AMP20MK2 Mini stereo amplifier. It is compatible with bTicino installation materials. The volume is fluently adjustable by means of a potentiometer, and the connection between the controller and the AMP20MK2 is achieved by using UTP CAT5 cabling with RJ45 connectors. Available in Black (B) and White (W).

Applications:

- Corporate spaces
- Residential

Variants:

- VC4008/B - Black version
- VC4008/W - White version
