

Ortofon | DJ S

Basic model for scratch and back-cueing
 Outstanding rigidity by extra-strengthened cantilever

Single
Concorda cartridge

Twin Case
Twin Concorda cartridges

Set Case
Concorda cartridge + extra stylus

DJ S Characteristics

DJ S is a solid-built cartridge in a new blue nylon material. It has a fine spherical stylus and a special developed and extremely balanced cantilever. Not only does the cartridge have a most sufficient tracking ability,

it is also nearly unbreakable and provides the DJ with the most-needed stringency. Furthermore, it equals very low record wear, an advantage for the busy DJ. The DJ S is definitely worth checking out!

Spherical Stylus
Scratch

Frequency Response
20-18.000 Hz + 3 / - 2 dB

Tracking Force
3,0 g

Replacement Stylus
DJ S

Output
6 mV

Sturdiness and Stability

Apart from sounding good, a professional disco cartridge has to be rugged - and the Ortofon disco cartridges are very rugged indeed. Scratching, back-cueing and live artistic performance impose heavy mechanical stress on the cantilever

and its rubber bearing. Therefore Ortofon disco cartridges are equipped with cantilevers made from aluminum tube with increased wall thickness. The DJ blue coloured cartridges have even been provided with a special telescopic cantilever construction consisting of a double tube design,
