

MP26-G is a stylish and powerful sound projector that is equipped with a high quality 26 W transformer.

The speaker is designed for high quality music and speech reproduction in many industrial or professional applications, indoors as well as outdoors. It combines a rugged housing with a good sound quality, and because all metal parts are either aluminum or stainless steel this speaker will stay rust-free. Guaranteed!

Thanks to the shape of the bracket it is possible to mount this sound projector with a power tool without taking the projector off the bracket. Yet again, a clever installer-friendly APart feature.

The standard color is Grey. As an option the MP26-G can be painted into any RAL color (REF: PAINTMP) Please note the minimum order quantity for PAINTMP is 12 pieces.

## TECHNICAL SPECIFICATIONS
