

Product Detail Page

FGA-35

Number: 21.2420

Stereo line transformer,

compact design, for preventing signal interference and hum loops which may occur, e.g. when connecting PC sound cards or notebooks to an amplifier.

- Galvanically isolated inputs and outputs
- 2 x 3.5mm stereo plug
- Input/output impedance: 20k Ω
- Frequency range: 20-30,000Hz
- THD: < 0.01%
- Transmission ratio 1:1
- \varnothing 24mm x 38mm, 32g
- Length including connection cable: approx. 80cm
