- 5. Menu Guide Buttons
- 6. Microphone

Back

1. DMX In
2. DMX Out

3. Power In
4. Fan

Mounting

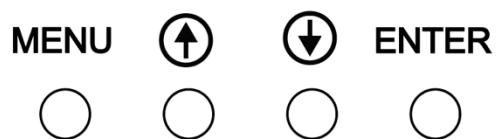

Orientation

Mover Beam 100 may be mounted in any position; however, make sure there is adequate ventilation around the product.

Rigging

- Before deciding on a location, make sure there is easy access to the product for maintenance and programming.
- Make sure adequate ventilation is provided around the product.
- Make sure that the structure or surface onto which you are mounting the product can support the products weight.
- Mount the product securely to a rigging point, weather an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of the appropriate weight capacity.
- When mounting the product on the floor, make sure that the product and cables are away from people.

Display Operation

- MENU: Access the menu
- UP: Scroll through menu selection or parameter increase
- DOWN: Scroll through menu selection or parameter decrease
- ENTER: Make Selection

Stand Alone Settings

To use your Mover Beam 100 without a DMX Controller, use one of the various standalone modes below.

***Please note, we do not recommend using products in standalone mode that are connected to a DMX string and controller. Standalone mode may transmit DMX signals that could interfere with DMX signals from the controller. ***

Automatic Programs

To run the Mover Beam 100 in Automatic Mode, follow the instructions below:

1. Press (Menu)
2. Use (Up or Down) to select Auto Program 1-4
3. Press (Enter) to return to menu

Sound Active Mode

To run the Mover Beam 100 in sound-active mode, do the following:

1. Press (Menu)
2. Use (Up or Down) to select Sound
3. Press (Enter) to return to menu

Sound Sensitivity

To set the Sound Active sensitivity on the Mover Beam 100, follow the instructions below:

1. Press (Menu)
2. Use (Up or Down) to select Sens
3. Use (Up or Down) to select Sound Sensitivity, low- high (01-99)
4. Press (Enter) to return to menu

Invert Pan

To set Pan orientation on the Mover Beam 100, follow the instructions below:

1. Press (Menu)
2. Use (Up or Down) to select IPan
3. Use (Up or Down) to turn the Pan orientation ON or OFF
4. Press (Enter) to return to menu

Invert Tilt

To set Tilt orientation on the Mover Beam 100, do the following:

1. Press (Menu)
2. Use (Up or Down) to select InvertTilt
3. Use (Up or Down) to turn the Tilt orientation ON or OFF
4. Press (Enter) to return to menu

Screen Reverse

To set the display orientation on the Mover Beam 100, follow the instructions below:

1. Press (Menu)
2. Use (Up or Down) to select LED
3. Use (Up or Down) to select ScreenRot
4. Press (Enter) to return to menu

Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light sources life and or mechanical wear. To maintain optimum performance and minimize wear, clean your lighting products regularly after extended use. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instruction below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or ISO.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Technical Information

- 100W white LED
- Color wheel with 7 colors plus open
- Gobo wheels: 12 metal gobos
- 0-100% linear dimmer
- Pan: 540°/ Tilt: 180°
- 18-facet prism
- 6 color rainbow prism
- DMX 11 &13 channel mode
- Master/ Slave, Sound Active, Auto- Programs, DMX 512
- DMX: 3-pin XLR In/Out
- Power Consumption: 120W
- Dimensions: 17" x 13" x 12" (423 x 322 x 297 mm)
- Weight: 15 lbs. (6.8 kg)
