All-in-One Display for Simple and Quick Video Call

With LG One:Quick Flex's 43-inch all-in-one display—complete with built-in camera, microphones and speakers—there's no need to stress over online meetings and calls and no more inconvenience of connecting to and setting up video conferencing.

Effective Collaboration with Touch and Drawing

Equipped with In-Cell touch technology, the One:Quick Flex turns ideas into reality. With the dedicated touch pen, taking notes and drawing are done easily. Also, these works can be saved as files, and easily shared via a mobile phone.

- * One touch pen provided.
- * Dedicated apps required for annotation and drawing (MS Whiteboard ready)

Easy Transport with a Movable Stand

The One:Quick Flex can be used anywhere indoors where it can be moved by wheels. From a private office to a public lounge, it plays various roles according to each need such as video conferencing, design demo, collaboration, etc.

- * Stands are sold separately.
- * The product needs to be plugged into the appropriate power source to operate.

Screen Rotation and Adjustable Height

The One:Quick Flex supports screen rotation when using the dedicated stand, which can be widely used by being turned vertically or horizontally according to the content ratio. Moreover, the height of the stand can be adjusted to meet the posture or height of the user.

- * Stands are sold separately.
- * To use it vertically, users can rotate counter clockwise, and vice versa to switch back to landscape mode.
- * Some apps may not support vertical view mode.

Intuitive UX and Excellent Expandability

The touch-based UX of One:Quick Flex is designed to be similar to the mobile touch UX, making it easy to use. Also, the operating system based on Windows makes it easy for the user to install and run programs they want through a huge library of applications and tools.

- * Screen images simulated.
- * The home dashboard (mid-screen app folder) and the function to add and delete apps on the launcher will be available in the 1Q of 2022.

A Sleek Design that Blends with the Space

Moving beyond the conventional black color, it is available in stylish beige with a smooth finish and blends effortlessly with the surrounding interior.

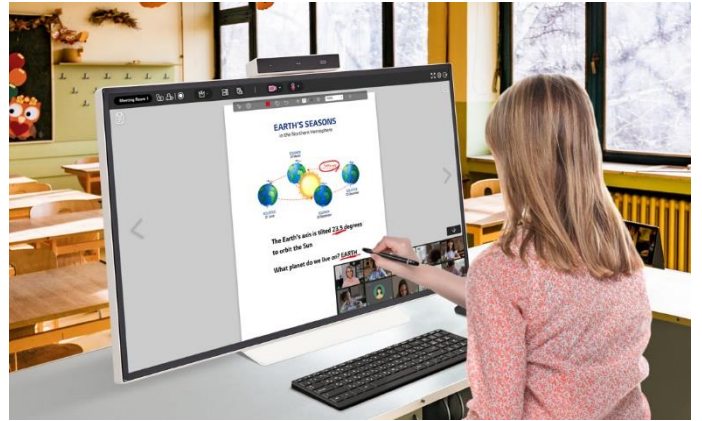

RECOMMEND TO USE IN/FOR:

| Kindergarten

An interactive educational tool for the child, with which their drawings and writings from during class can be saved as image files.

| School

Write on teaching material and have remote lessons without any additional equipment.

| Collaborative Workspace

Employees can freely describe their creative ideas with drawing and writing.

| Doctor's Office

Perform simple consultations or medical examinations remotely without meeting with the patient.

| Design Office

Have meetings and demonstrations with clients and contract in one place.

| Wards in a Hospital & Nursing Home

Re-connect with your family and relatives as if you were there.

* The example is provided for information purposes only; LG does not offer separate solutions or services.

* Screen configuration and function support may vary depending on the app used.
